

About Cyberoam

Cyberoam is the only identity-based Unified Threat Management (UTM) solution worldwide, offering comprehensive network security to enterprises. A division of Elitecore Technologies, Cyberoam is unique amongst UTM appliances worldwide offering a robust security feature set including firewall, VPN, gateway antivirus, gateway anti-spam, intrusion detection and prevention (IDP), content filtering, bandwidth management and multiple link management - all over a single platform.

About Elitecore Technologies

Elitecore Technologies Limited is a provider of UTM and Convergent Billing solutions. Elitecore's divisions include Cyberoam, the leading innovator of identity-based UTM solutions that offers comprehensive network security with fine granularity through unique user identity-based policies and Crestel, which meets the voice, data, video billing and customer care requirements of tier-one service providers. Elitecore possesses a strong R&D base and support center based in India, allowing the company to sustain a healthy growth rate of more than 75 percent since inception.

Customers

Cyberoam secures more than 2,000 global corporations across a broad range of vertical markets, including retail, education, and state and federal government sectors.

Key Leadership

- Hemal Patel - Managing Director and Chief Executive Officer
- Nikhil Jain - President and Chief Operating Officer
- Abhilash Sonwane - Vice President, Product Management
- Harish Chib - Vice President, New Business Development
- Joshua Block - Vice President, North American Operations

Investors

The global private equity firm, The Carlyle Group invested 10.3 million USD into Elitecore Technologies Limited in 2007.

Partners

Cyberoam's partnerships include OEM alliances with industry leading vendors including Kaspersky Lab, CommTouch, and The GreenBow. Cyberoam is 100 percent channel-focused with a Global Partner Program that includes leading distributors and resellers. Cyberoam is dedicated to strengthening its partner presence in the market through channel marketing, process automation and a comprehensive partner program that includes training and certification.

Certifications and Awards

Cyberoam is Checkmark UTM Level 5 certified, dual-certified by the Virtual Private Network Consortium (VPNC) for Basic and AES Interop and has achieved the Firewall Certification from ICSA Labs, an independent division of Verizon Business. Cyberoam has received Info Security Products Guide 2007 Global Excellence awards for Integrated Security Appliance, Security Solution for Education and Security Solution for Unified Security, as well as the Info Security Products Guide 2007 "Tomorrow's Technology Today" Award for Unified Security. Cyberoam has received a 5-star rating from SC Magazine. It was also named a finalist in the Best New Product or Service category for the 2007 American Business Awards and the Network Innovation Awards in the Middle East.
