

## CYBEROAM AGGREGATED REPORTING AND LOGGING SOLUTION

### Intelligent Reporting for Cyberoam Identity-based UTM Appliances

Cyberoam Reporter's concise and ready-to-interpret reports gather and correlate data to deliver customized reports to administrators, enabling them to build enhanced protection continually. Administrators can provide real-time, robust protection against evolving threats through Instant preventive action and Policy fine-tuning based on real usage information.

#### Key Features

- Aggregates logs and data from multiple CR appliances
- Centralizes Storage of reports and log data
- Provides Secured Role based access
- Allows Configuration of email id for sending reports
- Provides user wise Web Surfing Reports
- Provides detailed IDP reports
- Provides Anti-virus activity reports for SMTP, HTTP, FTP, POP3 and IMAP
- Provides Spam reports by individual users, source

Cyberoam Aggregated Reporting & Logging (CARL) solution enables organizations to detect security breaches, identify corporate violations and eliminate false positives while meeting evolving compliance regulations. By combining the following functionality into a single solution, CARL correlates data across the enterprise to provide insight into topology-based threat visualization, real-time monitoring and alerting and comprehensive reporting

## Log Management

- **Automated Data Collection**  
Automatically collects, aggregates, compresses, encrypts and archives log data across the enterprise
- **Scalable Architecture**  
easily scales to thousands of Cyberoam devices functioning as Firewalls, VPNs, IDS/ IPS systems, anti-virus/spyware systems, content filtering web security appliances and more

## Real-Time Monitoring & Alerting

- **Heterogeneous Monitoring**  
monitors security event data across the network in real time
- **Correlated Alerts**  
delivers over 150 built-in correlation policies to enable users to create alerts and set correlation intervals of up to 90 days

## Compliance Management

- **Automated Log Archiving**  
automatically compresses, encrypts and archives log files for investigative analysis and regulatory compliance
- **Compliance Monitoring**  
provides centralized monitoring and alert correlation for real-time investigation of security incidents that have regulatory compliance implications
- **Compliance Reporting**  
offers detailed reports specific to Sarbanes-Oxley (SOX), Payment Card Industry (PCI) data security standard, Gramm-Leach-Bliley Act (GLBA), Health Insurance Portability & Accountability Act (HIPAA) and Federal Information Security Management Act (FISMA)

## Over 500+ Drilldown Reports

- **Intrusion and Rules-Based Reporting**  
provides visibility into intrusions and rule violations
- **Usage Reporting**  
provides protocol and web usage patterns by user, department, device and content category
- **SPAM, Spyware and Anti-Virus Reporting**  
details spam, spyware and viruses across the enterprise
- **Flow Reporting**  
provides in-depth network details by traffic, conversation, port, protocol, bandwidth, top host and device activity
- **Automated Generation and Distribution**  
delivers email reports to multiple recipients in HTML, MHTML, PDF, Word, Excel and text formats
- **Security Dashboards**  
shows real-time alerts as well as details vulnerability, attack and flow information
